Job Description

Responsibilities/Duties:

- Mechanical Assembly
  - Works closely with mechanical engineer to develop/improve upon machine functionality
  - Assembly of machines within project schedules
  - Assembles engineer’s concept into reality
  - Reporting status to project manager on machine development, and escalating risks and issues
  - Interface with all project team (i.e. Software Engineer, Mechanical Engineer, Electrical Engineer, Assemblers, Project Manager...)
  - Analyzes full requirements of system involved and checks and tests system components.
  - Build tooling fixtures (on the fly where necessary)
  - Adheres to Inventory & Floor Stock procedures
- Customer Service
  - Answers support phone line as well as any voicemail throughout each business day
  - Responds to customer service calls (on-site, or on-line; during the day and after hours)
  - Ensures timely response to customers (i.e. Adhering to Customer Service SLAs “service level agreements”)
### Troubleshooting
- Risk Mitigation - anticipate problems before they occur
- Troubleshoots and debugs (i.e. Diagnoses trouble or defect, determines corrective action and repairs system)
- Performs preventative maintenance and diagnostics on automation system and components. Ensures that automation system is properly maintained and operating correctly.
- Completes service repairs, replacements, upgrades, adjustments and calibration on automation systems and components following issued tasking, maintenance, troubleshooting and installation instructions.
- Performs system checkout and assists in automation systems startups for service installed jobs. May coordinate electrical installation with electrical contractor at job site as required.
- If improper operation is due to another system or component, discusses problem with customer and/or office and advises of the best course of action.
- Knowledge of the software to be able to make programming changes and adjustments where necessary (e.g. Vision Cognex Insight, Maple Systems HMP/PLC Allen Bradley, IAI Controller)

### Documentation
- Read all spec sheets on machine to be fully knowledgeable; have a working knowledge of how machine works
- Completes and submits written service orders (for non-warranty as well as warranty products). Documentation to include such items as Issue, Resolution, Date/Time Customer Initiated Service Ticket, Date/Time ticket closed/resolved, ...
- Documents Quality Control, Test Plan & Acceptance Tests
- Documents Product Change Notifications and submits to Project Manager
- Mechanical BOM & Schematic redlines (and project closeout audit)

### Acceptance Tests
- Work in conjunction with engineers throughout assembly process to ensure thorough knowledge and familiarity with machine
- Testing of all aspects of machine
- Coordinate with customer to ensure we have samples for testing of the machine
- Coordinates and documents Acceptance Tests (based on customer requirements) and ensures signoff internally and final signoff by customer

### Shipping, Installation & Training
- Prepares machine for shipment to customer site
- Installs machine at customer site
- Trains the customer (e.g. process engineer) on all aspects of the machine
- Delivers technical support, coaching and direction to end users and field labor when applicable

### General
- Provides weekly status updates to Project Manager on assigned projects
- Escalates to Operations Project Manager and/or Customer Service Manager
- Completes and submits bi-weekly timesheets (includes project time tracking)
- Comply with the company safety procedures. Set an example of company culture with
integrity and professional competence.
  o Adhere to company policies & procedures
  o Must be able and willing to travel and work at customer sites
  o Involvement in Lessons Learned for all assigned projects
  o Continuous improvement in standardization of product line
  o Involved in the recruitment of new staff (e.g. interviews prospective persons)
  o Help Train/Orient/"Bring Up to Speed" new employees.

Minimum Work/Education Qualifications:
  • 5+ years experience as a mechanical assembly and/or field service technician preferable in the automation industry
  • Working engineering and programming background preferred. Skilled in programming, job start-up and checkout, and troubleshooting.

Qualifications/Skills:
  • Ability to read/understand SolidWorks mechanical drawings and schematics and do redlines
  • High precision, close tolerance proficiency
  • Ability to use all hand tools
  • Familiarity with machine shop equipment (e.g. mill machine, drill press, lathe...)
  • Must be able to lift at least 50 lbs.
  • Basic electronics knowledge
  • Very strong analytical and troubleshooting skills of mechanical systems
  • Aware of design tools and techniques
  • Proficient in standard and metric systems
  • MRP/ERP experience a plus
  • Proficient in MS Office 2010 (Excel, Word, Outlook) and general computer literacy
  • Excellent written and verbal communication and customer relation skills
  • Must be a self starter, team player, work well with others and have a positive attitude
  • Must have ability to prioritize, multi-task and meet deadlines
  • Sharp, quick, dedicated and innovative problem solver
  • Must be a creative thinker, results oriented, focused, and attentive to detail and accuracy
  • Core values and continuous self improvement
  • Must be organized, detail oriented, and able to think designs through completely
